Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

Claims 21-33, 37-42, 44-52, 54-89 are in the case.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 37-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morota et al (5,809,961) in view of Bey (5,480,123).

Morota et al teach a member 3 downstream of the throttle valve 2 to reduce noise associated with the air flowing past the throttle valve (see col. 2 line 49-52). Morota et al do not teach 5 to 11 evenly spaced parallel vanes extending into the flow passage. Bey shows a plurality of vanes being arranged in the same manner as claimed for reducing noise (see Figure 10). Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the evenly spaced parallel vanes less than 11 on the intake air flow passage downstream of the throttle valve of Morota et al as taught by Bey to further reduce noise in the intake system.

Allowable Subject Matter

3. Claims 21-33, 39-42, 44-52, 54-89 are allowed.

Response to Arguments

4. Applicant's arguments with respect to claims 21-33, 37-42, 44-52, 54-89 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
